Reports:

All successful applicants for all DHS grant and cooperative agreements are required to comply with DHS Standard Administrative Terms and Conditions available within Section 6.1.1 of <http://www.dhs.gov/xlibrary/assets/cfo-financial-management-policy-manual.pdf>. Federal Financial Report (FFR) required quarterly. Obligations and expenditures must be reported on a quarterly basis through the FFR (SF-425). A report must be submitted for every quarter of the period of performance, including partial calendar quarters, as well as for periods where no grant activity occurs. Future awards and fund drawdowns may be withheld if these reports are delinquent. The final FFR is due 90 days after the end date of the performance period. FFRs must be filed electronically through PARS. Grant Close-Out Process. DHS/FEMA will close out the grant award when it determines that all applicable administrative actions and all required work of the HSGP award have been completed by the recipient. This section summarizes the actions that the recipient must take to complete the closeout process in accordance with 2 C.F.R. 200.343 at the end of the grants period of performance or the issuance of a Grant Amendment Notice issued to close out the grant. Within 90 days after the end of the period of performance, or after an amendment has been issued to close out a grant, whichever comes first, recipients must submit a final FFR and final progress report detailing all accomplishments and a qualitative summary of the impact of those accomplishments throughout the period of performance, as well as the following documentation: 1) Final request for payment, if applicable; 2) SF-425 Final Federal Financial Report; 3) SF-PPR Final Performance Progress Report; 4) A qualitative narrative summary on the impact of those accomplishments throughout the entire period of performance submitted to the respective Grant Programs Directorate (GPD) HQ Program Analyst in a Word document; 5) SF-428 Tangible Personal Property Report Inventory of all tangible personal property acquired using funds from this award. 6) Other documents required by program guidance or terms and conditions of the award. If applicable, an inventory of all construction projects that used funds from this program has to be reported using the Real Property Status Report (Standard Form SF 429) available at

http://www.whitehouse.gov/sites/default/files/omb/grants/approved_forms/sf-429.pdf. Additionally, the recipient must liquidate all obligations incurred under the HSGP award no later than 90 calendar days after the end date of the period of performance or issuance of a Grant Amendment Notice that closes out the award, whichever comes first. Recipients who do not liquidate their obligations within this time period may have the costs of their unliquidated obligations disallowed. Recipients are also responsible for promptly returning to DHS/FEMA the balance of any funds that have been drawn down, but remain unliquidated. After these reports have been reviewed and approved by DHS/FEMA, a close-out notice will be completed to close out the grant. The notice will indicate the period of performance as closed, list any remaining funds the recipient has not drawn down that will be deobligated, and address requirements for record retention, and disposition and reporting requirements for any equipment or real property purchased using THSGP grant funding. In addition, any HSGP recipient that issues subawards to any subrecipient is responsible for closing out those subawards as described in 2 C.F.R. 200.343. HSGP recipients must ensure that they complete the closeout of their subawards in time to submit all necessary documentation and information to DHS/FEMA during the closeout of their own grant award. A Grant Amendment Notice issued to close out the grant. Within 90 days after the end of the period of performance, or after an amendment has been issued to close out a grant, whichever comes first, recipients must submit a final FFR and final progress report detailing all accomplishments and a qualitative summary of the impact of those accomplishments throughout the period of performance, as well as the following documentation: 1) The final request for payment, if applicable; 2) SF-425 Final FFR; 3) Final Performance Progress Report; 4) A qualitative narrative summary of the impact of those accomplishments throughout the entire PoP submitted to the respective FEMA HQ Program Analyst; and 5) Other documents required by program guidance or terms and conditions of the award. After these reports have been reviewed and approved by DHS/FEMA, a close-out notice will be completed. The notice will indicate the PoP as closed, list any remaining funds that will be de-obligated, and address the requirement of maintaining the grant records for three years from the date of the final FFR. In addition, any HSGP recipient that issues sub-awards to any subrecipient is responsible for closing out those sub-awards as described in 2 C.F.R. 200.343. HSGP recipients must ensure

ASSISTANCE LISTINGS DESCRIPTIONS

that they complete the closeout of their sub-awards in time to submit all necessary documentation and information to DHS/FEMA during the closeout of their grant award. The recipient is responsible for returning any funds that have been drawn down but remain as unliquidated on recipient financial records. Federal Financial Report (FFR) required quarterly. Obligations and expenditures must be reported on a quarterly basis through the FFR (SF-425). A report must be submitted for every quarter of the period of performance, including partial calendar quarters, as well as for periods where no grant activity occurs. Future awards and fund draw downs may be withheld if these reports are delinquent. The final FFR is due 90 days after the end date of the performance period. FFRs must be filed electronically through PARS. Grant Close-Out Process. DHS/FEMA will close out the grant award when it determines that all applicable administrative actions and all required work of the HSGP award have been completed by the recipient. This section summarizes the actions that the recipient must take to complete the closeout process in accordance with 2 C.F.R. 200.343 at the end of the grants period of performance or the issuance of a Grant Amendment Notice issued to close out the grant. Within 90 days after the end of the period of performance, or after an amendment has been issued to close out a grant, whichever comes first, recipients must submit a final FFR and final progress report detailing all accomplishments and a qualitative summary of the impact of those accomplishments throughout the period of performance, as well as the following documentation: 1) Final request for payment, if applicable; 2) SF-425 Final Federal Financial Report; 3) SF-PPR Final Performance Progress Report; 4) A qualitative narrative summary on the impact of those accomplishments throughout the entire period of performance submitted to the respective Grant Programs Directorate (GPD) HQ Program Analyst in a Word document; 5) SF-428 Tangible Personal Property Report Inventory of all tangible personal property acquired using funds from this award. 6) Other documents required by program guidance or terms and conditions of the award. If applicable, an inventory of all construction projects that used funds from this program has to be reported using the Real Property Status Report (Standard Form SF 429) available at http://www.whitehouse.gov/sites/default/files/omb/grants/approved_forms/sf-429.pdf. Additionally, the recipient must liquidate all obligations incurred under the HSGP award no later than 90 calendar days after the end date of the period of performance or issuance of a Grant Amendment Notice that closes out the award, whichever comes first. Recipients who do not liquidate their obligations within this time period may have the costs of their unliquidated obligations disallowed. Recipients are also responsible for promptly returning to DHS/FEMA the balance of any funds that have been drawn down, but remain unliquidated. After these reports have been reviewed and approved by DHS/FEMA, a close-out notice will be completed to close out the grant. The notice will indicate the period of performance as closed, list any remaining funds the recipient has not drawn down that will be deobligated, and address requirements for record retention, and disposition and reporting requirements for any equipment or real property purchased using THSGP grant funding. In addition, any HSGP recipient that issues subawards to any subrecipient is responsible for closing out those subawards as described in 2 C.F.R. 200.343. HSGP recipients must ensure that they complete the closeout of their subawards in time to submit all necessary documentation and information to DHS/FEMA during the closeout of their own grant award. Recipients will be monitored on an annual and as needed basis by DHS/FEMA staff, both programmatically and financially, to ensure that the project goals, objectives, performance requirements, timelines, milestone completion, budgets, and other related program criteria are being met. Monitoring may be accomplished through desk-based reviews on-site monitoring visits, or both. Monitoring will involve the review and analysis of the financial, programmatic, performance, compliance and administrative processes, policies, activities, and other attributes of each Federal assistance award and will identify areas where technical assistance, corrective actions and other support may be needed.

Audits:

In accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, nonfederal entities that expend financial assistance of \$750,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Non-Federal entities that expend less than \$750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503

Records:

Grant records shall be retained for a period of 3 years from the day the recipient submits its final expenditure report. If any litigation, claim, negotiation, audit, or

other action involving the records has been started before the expiration of the 3-year period, the records must be retained until completion of the action and resolution of all issues which arise from it, or until the end of the regular 3-year period, whichever is later. Grant records include financial and program/progress reports, support documents, statistical records, and other documents that support the activity and/or expenditure of the recipient or sub-recipient under the award.

CRITERIA FOR SELECTING PROPOSALS:

FEMA will evaluate FY 2018 HSGP applications for completeness, adherence to programmatic guidelines, and anticipated effectiveness of the proposed investments. FEMA's review will include verification that each IJ or project: Aligns with at least one core capability identified in the Goal; Demonstrates how investments support closing capability gaps or sustaining capabilities identified in the THIRA/SPR process; and Supports a NIMS-typed resource and whether those assets are deployable/shareable to support emergency or disaster operations per existing EMAC agreements. In addition to the above, FEMA will evaluate whether proposed projects are: 1) both feasible and effective at reducing the risks for which the project was designed; and 2) able to be fully completed within the three-year PoP. FEMA will use the information provided in the application and after the submission of the first BSIR to determine the feasibility and effectiveness of a grant project. To that end, IJs should include: An explanation of how the proposed project will achieve objectives as identified in the SPR, including expected long-term impact where applicable, and which core capability gap(s) it helps to close and how; A summary of the status of planning and design efforts accomplished to date (e.g., included in a capital improvement plan); and A project schedule with clear milestones. Recipients are expected to conform, as applicable, with accepted engineering practices, established codes, standards, modeling techniques, and best practices, and participate in the development of case studies demonstrating the

ASSISTANCE LISTINGS DESCRIPTIONS

effective use of grant funds, as requested. To ensure the effectiveness of proposed investments and projects, all applications will undergo a federal review. The federal review will be conducted by FEMA HQ Program Analysts. FEMA HQ Program Analysts will use a checklist to verify compliance with all administrative and eligibility criteria identified in the NOFO. Recipients must be able to demonstrate how investments support closing capability gaps or sustaining capabilities identified in the THIRA/SPR process. IJs will be reviewed at both the investment and project level. A program hold may be placed on any investment which is found to be noncompliant. Fusion center investments will be jointly reviewed by FEMA and the DHS Office of Intelligence and Analysis (I&A) for compliance with HSGP NOFO requirements to prioritize the alignment of requests with results from the annual Fusion Center Assessment Program. If a fusion center investment does not meet the requirements, a Fusion Center Addendum must be completed and submitted for review and approval prior to expending funds allocated to fusion center activities. Emergency communications investments will be jointly reviewed by FEMA and the DHS Office of Emergency Communications (OEC) to verify compliance with SAFECOM guidance. FEMA and OEC will coordinate directly with the recipient on any compliance concerns and will provide technical assistance as necessary to help ensure full compliance. DHS/FEMA will verify compliance with all administrative and eligibility criteria identified in the NOFO and required submission of Operations Orders and Inventory of Operations Orders by the established due dates. DHS/FEMA and USBP will use the results of both the risk analysis and the Federal review by DHS/FEMA to make recommendations for funding to the Secretary of Homeland Security. FY 2018 OPSG funds will be allocated competitively based on risk-based prioritization using the USBP Sector-specific border risk methodology described above. Final funding allocations are determined by the Secretary, who may consider information and input from various law enforcement offices or subject matter experts within the Department. Factors considered include, but are not limited to: threat, vulnerability, miles of border, and other border-specific law enforcement intelligence, as well as feasibility of FY 2018 Operation Orders to designated localities within the United States Border States and territories.

97.075 Rail and Transit Security Grant Program

TSGP/IPR (AMTRAK),

FEDERAL AGENCY:

FEDERAL EMERGENCY MANAGEMENT AGENCY, HOMELAND
SECURITY, DEPARTMENT OF

AUTHORIZATION:

Implementing Recommendations of the 9/11 Commission Act of 2007, Section 1406, Public Law 110-53, 6 USC Code 1135.

OBJECTIVES:

The FY 2018 TSGP and IPR are set against the backdrop of a year in which the United States faced numerous and unprecedented homeland security challenges. These included the three major hurricanes that devastated parts of Texas, Florida, and much of Puerto Rico and the U.S. Virgin Islands, as well as massive wildfires across the State of California. In addition to these natural disasters, the Nation also responded to multiple incidents as part of the evolving threat landscape, including witnessing the first known attempted terrorist attack against mass transportation on our soil; cyberattacks against critical port infrastructure; and mass casualty events involving both vehicles and active shooters. The National Preparedness Goal (the Goal) defines what it means to be prepared for such diverse and complicated events. The National Preparedness System is the instrument the Nation employs to build, sustain, and deliver the core capabilities needed to achieve the goal of a more

secure and resilient Nation. The development and sustainment of these core capabilities is not exclusive to any single level of government or organization, but rather requires the combined effort of the whole community. To that end, the FY 2018 TSGP and IPR represent one part of a comprehensive set of measures authorized by Congress and implemented by the Administration. Among the five basic homeland security missions noted in the DHS Quadrennial Homeland Security Review, the TSGP supports the goal to Strengthen National Preparedness and Resilience.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

The TSGP and IPR Program are two of the Department of Homeland Security's FY 2018 grant programs which directly support transportation infrastructure security activities. These grant programs are part of a comprehensive set of measures authorized by Congress and implemented by the Department of Homeland Security to strengthen the Nation's critical infrastructure against risks associated with potential terrorist attacks. TSGP provides funds to the Nation's High-Threat Urban Areas for enhancement of security measures at critical transit infrastructure including bus, ferry, and rail systems. The intent of the FY 2018 TSGP is to competitively award grant funding to assist transit systems in obtaining the resources required to support the NPGs associated mission areas and core capabilities. IPR Program provides funds to Amtrak to develop security enhancements for eligible intercity passenger rail operations. The intent of the FY 2018 IPR is to grant funding to assist the Amtrak rail system in obtaining the resources required to support the NPGs associated mission areas and core capabilities.

Applicant Eligibility:

Sponsored organization; Non-Government - General; Agencies eligible for FY 2018 TSGP are determined based upon daily unlinked passenger trips (ridership) and transit systems that serve historically eligible Urban Area Security Initiative (UASI) jurisdictions. Certain ferry systems are eligible to participate in the FY 2018 TSGP and receive funds. However, any ferry system electing to participate and receive funds under the FY 2018 TSGP will not be eligible to participate under the FY 2018 Port Security Grant Program (PSGP) and will not be considered for funding under the FY 2018 PSGP. Likewise, any ferry system that participates in the PSGP will not be eligible for funding under the TSGP. The 9/11 Act requires that high risk public transportation agencies, including those that receive grant funding, must develop a security plan based on a security assessment. Additionally, the legislation directs that grant funds be used to address items in the security assessment or the security plan. In order to be eligible for the FY 2018 TSGP, transit agencies must have developed and/or updated their security plan, which must be based on a security assessment such as the Baseline Assessment and Security Enhancement (BASE) performed by Transportation Security Inspectors-Surface from the Transportation Security Administration (TSA), within the last three years. A copy of the Security Plan and security assessment must be available for DHS review upon request. Entities providing transit security (e.g., city/county police department, transit agency's own police department) for a transit agency must approve the security plan. The signature of a responsible official from the agency's transit security provider serves as this approval. If there is more than one provider in the core service area, all transit security providers must review and concur with the plan. Associated documentation of this approval must be provided to DHS upon request. In addition, the agency's transit security provider is encouraged to review the Investment Justifications (IJ) prior to submission. Each Regional Transit Security Working Group (RTSWG) is required to develop and update at least every three years a Regional Transit Security Strategy (RTSS). As the owners and/or operators of infrastructure that is vital to the well being of the States and Urban Areas they serve, it is imperative that transit systems be incorporated into regional preparedness planning efforts. A copy of the Security Plan or security assessment must be available for DHS review upon request. The National Passenger Railroad Corporation (Amtrak) is the only entity eligible to apply for funding under FY 2018 IPR Program. For more information, refer to the FY 2018 TSGP and IPR Program Notice of Funding Opportunity (NOFO) National Incident Management System (NIMS) Implementation. In accordance with Homeland Security Presidential Directive (HSPD)-5, Management of Domestic Incidents, the adoption of NIMS is a requirement to receive Federal preparedness assistance, through grants, contracts, and other activities. Prior to allocation of any Federal preparedness awards in FY 2018, grantee must ensure compliance and/or

ASSISTANCE LISTINGS DESCRIPTIONS

alignment with the NIMS implementation plan. The list of objectives against which progress and achievement are assessed and reported can be found at <http://www.fema.gov/emergency/nims/ImplementationGuidanceStakeholders.shtm#item2>. The primary grantee/administrator of FY 2018 TSGP and IPR Program award funds is responsible for determining if sub-awardees have demonstrated sufficient progress in NIMS implementation to disburse awards.

Length and Time Phasing of Assistance:

The period of performance for TSGP is 36 months. The period of performance for the IPR Program is 36 months. Refer to FY 2018 TSGP or IPR Program Notice of Funding Opportunity (NOFO) for more information. Awards are subject to the Cash Management Improvement Act for payment and/or reimbursement of expenditures. The periods of performance outlined above support the effort to expedite the outlay of grant funding and provide economic stimulus. The grantee should request waivers sparingly, and they will be granted only due to compelling legal, policy, or operational challenges. For example, the grantee may request waivers from the deadlines outlined above for discretionary grant funds where adjusting the timeline for spending will constitute a verifiable legal breach of contract by the grantee with vendors or sub-recipients, or where a specific statute or regulation mandates an environmental review that cannot be completed within this timeframe or where other exceptional circumstances warrant a discrete waiver. Reports:

Performance Progress Report (SF-PPR). Awardees are responsible for providing updated performance reports using the SF-PPR (OMB Approval Number 0970-0334) on a semi-annual basis. The SF-PPR is due within 30 days after the end of the reporting period (July 30 for the reporting period of January 1 through June 30; and January 30 for the reporting period of July 1 through December 31). Grantees should submit the SF-PPR as an attachment to the Non Disaster (ND) Grants system. The SF-PPR can be accessed online at http://www.na.fs.fed.us/fap/SF-PPR_Cover%20Sheet.pdf. Exercise Evaluation and Improvement. Exercises implemented with grant funds should evaluate performance of the capabilities required to respond to the exercise scenario. Guidance related to exercise evaluation and the implementation of improvements is defined in the Homeland Security Exercise and Evaluation Program located at <https://hseep.dhs.gov>. Monitoring. Grant recipients will be monitored periodically by FEMA staff, both programmatically and financially, to ensure that the project goals, objectives, performance requirements, timelines, milestone completion, budgets, and other related program criteria are being met. Monitoring may be accomplished through either a desk-based review or on-site monitoring visits, or both. Monitoring will involve the review and analysis of the financial, programmatic, performance, compliance and administrative processes, policies, activities, and other attributes of each Federal assistance award and will identify areas where technical assistance, corrective actions and other support may be needed. Federal Financial Report (FFR) required quarterly. Obligations and expenditures must be reported on a quarterly basis through the FFR (SF-425). A report must be submitted for every quarter of the period of performance, including partial calendar quarters, as well as

The final FFR is due 90 days after the end date of the performance period. FFRs must be filed electronically through PARS. Grant Close-Out Process. Within 90 days after the end of the period of performance, or after a Grant Adjustment Notice (GAN) has been issued to close out a grant, whichever comes first, grantees must submit a final FFR and final progress report detailing all accomplishments throughout the period of performance. After these reports have been reviewed and approved by FEMA, a close-out notice will be completed to close out the grant. The notice will indicate the period of performance as closed, list any remaining funds that will be deobligated, and address the requirement of maintaining the grant records for three years from the date of the final FFR. The grantee is responsible for returning any funds that have been drawn down but remain as unliquidated on grantee financial records. CRITERIA FOR SELECTING PROPOSALS:

TSGP grantees must comply with all administrative requirements described herein & 8213; including the submission of IJs, budgets, and other application materials as required. Having met all administrative requirements, the application will be scored based on a methodology that will ensure consistent and accurate evaluations of projects and proposals. The following process will be used to make awards for the program: DHS will verify compliance with each of the administrative and eligibility criteria identified in the application kit. The Department will calculate a total score to aid with funding selections. The total score will consist of four individual parts: an agency-based risk score, a score associated with an applications alignment to the funding priority areas, a score based on project risk mitigation, and the degree of regional collaboration. Eligible applications will be reviewed by a panel to determine the risk mitigation and regional collaboration scores. This

panel will consist of Federal officials from multiple government agencies that will review each application and score it based on the following criteria: cost effectiveness, feasibility, timelines, and sustainability without additional Federal funds. FEMA and TSA will make recommendations for funding to the Secretary of Homeland Security based on the funding priorities and scoring methodology. For IPR Program, based on previously cited statutory authorities, DHS has elected to enter into a cooperative agreement with Amtrak. The nature of the Federal involvement in the execution of this program may include joint participation in a project. Other examples of prospective substantial Federal involvement include the following: Collaboration, participation, and/or intervention in any activity covered by the cooperative agreement. Approval from DHS prior to the selection of a new project or commencement of the next phase of an approved project. Authority for DHS to halt an activity if detailed performance specifications are not met. Authority for DHS to direct or redirect the scope of work of a project based on new circumstances. Authority for DHS to create a working group of key Federal and private sector stakeholders to provide guidance and coordination for transit security activities. Funds for both programs will not be made available for obligation, expenditure, or drawdown until the applicants budget and budget narrative have been approved by FEMA. The applicant must provide a detailed budget for the funds requested. The detailed budget must be submitted with the grant application as a file attachment within <http://www.grants.gov>. The budget must be complete, reasonable, and cost-effective in relation to the proposed project. The budget should provide the basis of computation of all project-related costs, any appropriate narrative, and a detailed justification of Management and Administration (M&A) costs.

FEDERAL AGENCY:

FEDERAL EMERGENCY MANAGEMENT AGENCY, HOMELAND SECURITY, DEPARTMENT OF

AUTHORIZATION:

The National Earthquake Hazards Reduction Act of 2004, Public Law 108-360, 42 USC Code 7704(a)(2)(B).

OBJECTIVES:

The National Earthquake Hazards Reduction Program (NEHRP) is the Federal Governments coordinated approach to addressing earthquake risks. In support of NEHRP, the Federal Emergency Management Agency (FEMA) administers the Earthquake Consortium and State Support (ECSS) program which is designed to increase and enhance the effective implementation of earthquake risk reduction activities at the state and local level, by making funding available through annual, non-competitive cooperative agreements. NEHRP implements the Department of Homeland Security and PPD-8 objective of hazard mitigation, to develop and maintain those capabilities necessary to reduce the loss of lives and property by lessening the impact of earthquakes. In an effort to provide eligible States and Territories with multiple funding and project management options, as well as allow for multi-State coordination of projects, the ECSS program utilizes two separate funding opportunities; Direct State Assistance and Earthquake Consortia & Partner Support. The Direct State Assistance funding opportunity provides funding directly to those States and Territories that have been determined to be at a moderate to very high risk of earthquakes, and who have certified that they can meet the statutory 50 percent cash match requirement. They must also ensure that they who have the staffing capacity to manage their anticipated level of involvement in FEMA-funded, NEHRP projects and activities. Funding is provided to eligible States and Territories through Cooperative Agreements that are administered by FEMA Regional earthquake program management staff. Eligible activities include: Development of seismic mitigation plans, preparing inventories and conducting seismic safety inspections of critical structures and lifelines, updating building codes, zoning codes, and ordinances to enhance seismic safety, increasing earthquake awareness and education, and encouraging the development of multi-State groups for such purposes. The Earthquake Consortia and Partner Support funding opportunity is designed to facilitate the development and management of multi-State projects and activities. Funding is provided to Earthquake Consortia & Partners through a Cooperative Agreement and applied to projects and activities submitted to FEMA by eligible States, Territories and other Federal earthquake partners. These Cooperative Agreements are administered by FEMA Headquarters earthquake program management staff. Eligible Consortia and Partners include: the Central U.S. Earthquake Consortium (CUSEC), Northeast States Emergency Consortium (NESEC), Western States Seismic Policy Council (WSSPC), Cascadia Region Earthquake Workgroup (CREW), Earthquake Engineering Research Institute (EERI), Federal Alliance for Safe Homes (FLASH), Southern California Earthquake Center (SCEC), and the Applied Technology Council, (ATC). Eligible activities for this funding opportunity are determined by capability of individual Consortia and Partner and are specified in the Notice of Funding Opportunity (NOFO).

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2017: The Smoke and Particulate Resistant Structural Firefighter Turnout gear (SRT) project was completed. This included developmental testing by firefighters to determine what prototype turnout configuration meets the requirements of the project, while minimizing any change to normal structural firefighter concept of operations. Lion, PPE, the developers industrial partner for this effort, obtained National Fire Protection Association (NFPA) 1971 certification for the SRT garments. An Operation Field Assessment (OFA) was conducted by DHS S&T in August 2017 at the FEMA National Fire Academy in Emmitsburg, MD. A soft roll-out of the SRT garment occurred on November 1, 2017 by Lion, PPE. Lion had a full commercial release occurred at the Fire

ASSISTANCE LISTINGS DESCRIPTIONS

Department Instructors Conference (FDIC) in April 2018. The SRT garments are being marketed by Lion as the REDZONE Contaminate Control package. NFPA 1975 certification for the prototype base ensemble garments was obtained by the industrial partners for both of the base ensemble award recipients in August 2017. The Next Generation First Responder (NGFR) program received 100 NFPA certified garment ensembles (i.e. shirt and pants) for their Spiral 2 exercise in August 2017. One hundred fifty prototype ensembles from each industrial partner were received in early FY 2018 for wear testing by law enforcement, fire, and EMS personnel across the United States, and in the UK and Sweden. Feedback from the wear testers will be provided to the industrial partners so they can make any required modifications to the garments before commercialization. Testing and characterization of potential filter media for use in the Respiration Protection for Firefighters during Overhaul Operations project continued during FY 2017. There is currently no air filter canister that is specifically designed for firefighting overhaul activities, so firefighters may not have the best level of protection of hazardous chemical which are present during overhaul activities. Both particulate filtration media and charcoal filtration (to remove hazardous vapors) were investigated, with the goal of developing a filter canister optimized for removing the hazardous chemicals that are present during overhaul activities. Congress legislated P25 CAP to ensure LMR equipment complies with P25 standards for interoperability across suppliers. The P25 CAP is a partnership of DHS's Office for Interoperability and Compatibility (OIC), industry, and the first responder community. The initial program focused on the Common Air Interface, which allows for over-the-air compatibility between radios and tower equipment. To continue improving the P25 CAP process, OIC developed a Compliance Assessment Bulletin (CAB) for testing of the Inter Sub-system Interface (ISSI) as part of the P25 CAP. However, P25 CAP recognized laboratories have been reluctant to expand their testing beyond the Common Air Interface (CAI) to include the ISSI. In part, the reluctance can be attributed to a seeming lack of financial benefit for the labs to invest in the resources needed to conduct ISSI testing. More recently, OIC has initiated the development of a CAB for testing of the Console Sub-System Interface (CSSI). It is believed that the laboratory requirements would be very similar for a participating laboratory to conduct testing for both of these interfaces. OIC has an opportunity to effect change in this area. OIC is interested in the capability of testing and evaluating ISSI and CSSI equipment from the various vendors. OIC will share its existing knowledge on the topic and refer to others with ISSI/CSSI testing expertise and work closely with the P25 CAP Advisory Panel members and other US Federal law enforcement organizations. Fiscal Year 2018: As previously mentioned, the Smoke and Particulate Resistant Structural Firefighter Turnout gear (SRT) garments were commercially released by Lion PPE under the REDZONE Contaminant Control Package tradename. Initial response by fire departments has been very positive. Wear testing for the base ensemble garments began in FY 2018. Garments are still being distributed to some first responder agencies due to unexpected sizing and shipment/distribution issues. Feedback from the wear testers will be provided to both vendors and their industrial partners so they have the opportunity to make any modifications to the garments before they are commercialized. Selection of both particulate and charcoal filter media for use in the Respiration Protection for Firefighters during Overhaul Operations project continued during FY 2018. Modifications to the selected charcoal mixtures are being made to characterize performance of the mixtures against hazardous vapors found at the scene of structural fires and during the NIOSH certification tests. A rubber boot that fits over filter canisters and contains protection against large particulate matter is also being developed. Clogging of the filter canisters particulate filter is often the limiting factor for the useful life of the canister. The addition of a cleanable, reusable filter for protection against large particulates (similar to the foam air filter for a lawn mower, etc.) should extend the useable lifetime of filter canisters and will be able to be used with any filter canister system. The work on the Overhaul filter canister system is anticipated to be completed in late FY 2018. An S&T Operational Fire Assessment (OFA) is scheduled to occur in early FY 2019. The OFA provides an opportunity for firefighters to test the developed technology under controlled and/or simulated conditions to ensure that it meets operational requirements and does not interfere with normal operational tasks. In FY 2018, an Award for the development of respiratory protection for wildland firefighters was made. Currently, wildland firefighters either have no respiratory protection, or use other techniques and methods (such as a wet bandana) to provide respiratory protection. While these other methods may provide some protection against large particulates, they do not protect against the fine particulates that are most damaging

to the lungs, or against the hazardous chemical vapors that are present. The project was initiated in April 2018, with a scheduled conclusion in September 2019. Initial concepts are being developed for a scarf-like structure that is light weight, easy to carry, and is comfortable to wear for extended periods of time. The charcoal mixture development work that was conducted for the Respiration Protection for Firefighters during Overhaul Operations project will be leveraged for the Wildland Firefighter Respiratory Protection project. The final charcoal mixture developed for the Overhaul project will be used as the starting point of the investigation of an optimized filtration system for the Wildland project. In FY 2018, an Award for the development of a durable glove for use in hoist rescue operations was made. Currently rescue hoist personnel are using a variety of gloves to guide the wire hoist cable during rescue missions. The weighted moving cable causes severe degradation of the gloves, often requiring the rescue hoist personnel to frequently change gloves, sometimes daily. The goal of this project is to develop a glove that will provide the required levels of protection and durability for rescue hoist personnel, without causing damage to the rescue cable. The project was initiated in April 2018, with a scheduled conclusion in March 2019. Base on input from rescue hoist personnel, potential materials are being tested for their durability and glove designs are being developed. Fiscal Year 2019: During FY 2019, the wear testing for the base ensembles from both performers will be completed and comments from the evaluators provided to the appropriate performer and their industrial partner. It is anticipated that both of the base ensemble garments will be commercially available from the performers industrial partners. The Operational Field Assessment (OFA) for the Respiration Protection for Firefighters during Overhaul Operations project will be completed. The filter canister and rubber boot particulate filter system is anticipated to be commercially released at the Fire Department Instructors Conference (FDIC) in April 2019. The hoist rescue glove will be completed. It is anticipated that the glove will be developed through an iterative process. Prototype gloves will be developed and provided to rescue hoist operators for operational testing. Their feedback to the developer will be incorporated into revised prototype gloves, which will then again be provided to rescue hoist personnel for their operational testing. It is anticipated that up to three prototype gloves may be tested before the design is finalized. The performer is working with two glove manufacturers on this project, so it is anticipated that one or both of these manufacturers will commercialize the rescue hoist gloves that are developed. Work on the wildland firefighter respiratory protection project will continue during FY 2019. It is anticipated that concepts for the scarf-like structure will be presented to wildland firefighters to determine what materials, construction, fasteners, etc. will be able to be worn comfortably for an extended period of time. Work on the size and shape of the filters, charcoal bed depth, filter holding system, material used in the filter frame, etc. will be performed with close cooperation of the wildland firefighter community. Depending on availability of prototype wildland firefighter respiratory devices and wildland firefighters to test the device (which is dependent on the number of wildland fires that are occurring at the time), it is possible that an Operational Field Assessment (OFA) of the prototype wildland respiratory protection device may occur in late FY 2019. B) National Information Sharing Consortium (NISC) Update the NISC Strategic Plan to cover the next 3-5 years and focus on strategic priorities to increase revenue and expand business opportunities. Increase NISC membership through outreach and engagement in exercises (e.g. CHECKPOINT 17) Update the NISC publications and guidance for the emergency management and healthcare communities. Continue to solicit sponsorships for financial support from other information sharing and geospatial information systems organizations. C) National Alliance for Public Safety GIS (NAPSG) Assess the geospatial information sharing capabilities of the GIS Inventory, and its integration, interoperability, and scalability with the DHS Geospatial Information Infrastructure (GII) and other existing capabilities Identify common mutual aid information to be shared across organizations Identify and develop guidance for Mutual Aid Resource management dashboards Test interoperability and integration of existing mutual aid technologies and standards-based tools D) Deliver a protocol for answering text-to-911 calls that includes scripts and best practices necessary for effective, accurate and efficient text-to-911 provisioning. Conduct pilot testing of the technology solution to validate and refine the preliminary text-to-9-1-1 translation operational requirements and to collect data on the number, length, and complexity of text-to-911 interactions in Spanish. The pilot is critical to ensure that all overall project deliverables are informed by real world Public Safety Answering Point (PSAP) input and field tested to validate assumptions and thresholds. The Text-to-911 specification and standard will be finalized, and a cost model template and cost basis will be developed.

The Department of Homeland Security (DHS) has the lead for the federal government in securing civilian government computer systems, and works with industry and state, local, tribal and territorial governments to secure critical infrastructure and information systems by: analyzing and reducing cyber threats and vulnerabilities; distributing threat warnings; coordinating the response to cyber incidents to ensure that our computers, networks, and cyber systems remain safe. Furthermore, Presidential Policy Directive 21 requires DHS to serve as the focal point for the security of cyberspace. Within DHS, the National Protection and Programs Directorate (NPPD) Office of Cybersecurity and Communications (CS&C) works to enhance the security, resiliency, and reliability of the Nations cyber and communications infrastructure. The DHS Cybersecurity Education and Awareness Branch (CE&A) manages programs to develop the highly-skilled cybersecurity professionals needed to secure the nations cyber infrastructure and information systems. Consequently, CE&A is seeking to make an investment to promote cybersecurity training and awareness for elementary, middle, and high school aged students and their teachers. Additionally, to optimize and expand existing cybersecurity education programs, a comprehensive engagement strategy is needed to reach those K-12 educators. By investing in the number of young people who will benefit from cybersecurity education and awareness, the return on investment will be multiplied. Increasing the number of graduates of Science, Technology, Engineering, and Mathematics (STEM) disciplines is key to the success of our nation. Furthermore, the recruitment and retention of individuals with these skills is an important element in the development of our Nations cybersecurity workforce. Objectives DHS, through CETAP, seeks to implement a Cyber-Integrated Curricular Model (CICM), which will accomplish the following goals: Goal 1: Expand awareness of national cybersecurity education and workforce issues. Goal 2: Encourage entry into cybersecurity academic programs and careers through hands-on, engaging cybersecurity-integrated ready-to-use tools. Goal 3: Provide a portable curricular model to aid in replication to all 50 States, Washington D.C., Puerto Rico, and the US Virgin Islands. Goal 4: Offer the means to measure the long-term effects of teacher training in the use of the proposed curricular solution and its impact on students, including the number of teachers

who are trained, the number of students they instruct, the number of students that choose to pursue cybersecurity-related STEM disciplines and cybersecurity professions, and define and track other key metrics. Goal 5: Develop and implement a comprehensive engagement strategy that enables DHS to reaching an increasing number of K-12 stakeholders.

97.131 Emergency Management Baseline Assessments Grant (EMBAG)

EMBAG,

FEDERAL AGENCY:

FEDERAL EMERGENCY MANAGEMENT AGENCY, HOMELAND SECURITY, DEPARTMENT OF
AUTHORIZATION:

Homeland Security Act of 2002, as amended, 6 U.S.C. 313(b)(2)(G); 6 U.S.C. 313(b)(2)(B); 314(a)(10); and 314(a)(11), Section 503(b)(2)(G), Public Law 114-113, 6 USC Code 313(b)(2).

OBJECTIVES:

The FY 2018 EMBAG Program will support the revision of a set of American National Standards Institute (ANSI)-certified standards for emergency preparedness and response; the development and maintenance of a related assessment methodology for the evaluation of state, local and territorial, and tribal emergency management organizations; and the implementation of an emergency management assessment program based on the ANSI-certified national standards enables standardized benchmarking of critical functions necessary for an emergency management organization to build, sustain, and deliver the 32 core capabilities identified in the National Preparedness Goal (the Goal). By advancing the Goal through ANSI-certified national standards, the EMBAG Program supports the Quadrennial Homeland Security Review Mission to Strengthen National Preparedness and Resilience. The EMBAG Program also supports the FEMA 2018-2022 Strategic Plan Strategic Goal 1: Build a Culture of Preparedness. Accreditation of emergency management functions such as planning, operations coordination, and communications based on a national standard ensures that there are benchmarks in place for comparative evaluations. The assessment and accreditation process empowers a jurisdiction to understand its emergency management organizations capacity and shortfalls and develop a path for improvement. Jurisdictions can then use the results of the assessment and accreditation process to build, sustain, and improve preparedness activities, as well as inform proposed investment justifications under other FEMA preparedness grant programs. Tracking improvements to preparedness informs and guides development of State Preparedness Reports. These capability assessments provide the states and territories with an accounting of current capability levels and gaps, which jurisdictions can use to prioritize future resource investments. The assessment and accreditation process supported by EMAP must include a review of the following areas (16) within an emergency management organization: 1. Emergency Management Program Administration, including Authorities, Oversight, and Strategic Planning; 2. THIRA Development; 3. Continuity of Government and Continuity of Operations; 4. Incident Management, to include NIMS and NQS Implementation; 5. Emergency Management Finance, including Disaster Cost Recovery; 6. Operations and Procedures; 7. Consequence Analysis; 8. Emergency Planning, including Mutual Aid, Communications, and Warning; 9. Evacuation and Shelter in Place; 10. Mass Care and Sheltering; 11. Resource Management and Logistics; 12. Recovery;

13. Disaster Housing; 14. Hazard Mitigation; 15. Training and Exercises, including Alignment with the Homeland Security Exercise and Evaluation Program (HSEEP); and 16. Public Affairs. Overall Objectives EMAP will be responsible for the following Objective requirements (15) and will outline how they intend to meet them in their Work Plan: 1. Maintain ANSI-certified national standards that are consistent with: a. NPS; and b. PPD-40, National Continuity Policy. 2. Recommend that the EMAP Commission include the Threat and Hazard Identification and Risk Assessment (THIRA) as part of the ANSI standards. 3. Secure agreements and complete approximately 10 state/territory/local/tribal assessments against ANSI-approved national standards. 4. Incorporate a review of THIRA as part of their assessments, verifying content and completeness of the THIRA as required by the National Preparedness Directorate (NPD)/National Preparedness Assessment Division (NPAD). 5. Incorporate the 2017 NIMS refresh, the Homeland Security Exercise and Evaluation Program (HSEEP), the 2018 Continuity Guidance Circular (CGC), Federal Continuity Directives (FCDs), the NDRF, and other DHS/FEMA guidance and policy, as appropriate, in its assessments. 6. Conduct three separate reviews and gap analyses in tandem with each jurisdiction assessment conducted as part of this program and provide results to FEMA/NPAD. All tasks are outlined in Actions I-III of this NOFO, and review alignment of jurisdiction: a. Continuity Plans to National Continuity Policy (2016 EMAP Standards: 4.4.2, 4.4.5, 4.4.6, and 4.7.1); b. Resource management systems to NIMS/NQS (2016 EMAP Standards: 4.6.1 and 4.6.5); and c. EOPs and Recovery Plans or their equivalents to NDRF guidance (2016 EMAP Standards: 3.4.1, 4.4.3, and 4.4.4). 7. Support FEMA in conducting a pilot of the Continuity Assessment Tool (CAT) in developing a baseline and methodology for the FEMA 2018-2022 Strategic Plan Objective 2.4, Improve Continuity and Resilient Communications Capabilities and provide results to FEMA/NPAD. 8. Present the EMAP process and the emergency management standards and accreditation guidelines at National Emergency Management Association and International Association of Emergency Managers annual conferences and provide a copy of the briefing to FEMA/NPAD 10 days before the conferences to review. 9. Maintain a web-based portal for jurisdiction self-assessments. 10. Execute a peer-review process for emergency management organization accreditation. 11. Conduct a follow-up survey with jurisdictions that have completed baseline assessments requesting feedback on the process. A copy of the survey and the results of the survey should be provided annually to FEMA/NPAD. 12. Provide webinars for training on standards and training on emergency management organization standards and the accreditation process. 13. Provide training for assessors. 14. Develop additional emergency preparedness and response standards and peer-assessment and accreditation processes as needed. 15. HOUSING AND URBAN DEVELOPMENT, DEPARTMENT OF

14.008 Transformation Initiative: Choice Neighborhoods Demonstration Small Research Grant Program

FEDERAL AGENCY:

ASSISTANT SECRETARY FOR POLICY DEVELOPMENT AND RESEARCH, HOUSING AND URBAN DEVELOPMENT, DEPARTMENT OF

AUTHORIZATION:

Consolidated and Further Continuing Appropriations Act, 2012, This program is approved by HUD's authority and administered under the Transformation Initiative (TI) account., Public Law 112-55

OBJECTIVES:

The purpose of this effort is to develop and implement small scale research projects that build upon the larger Choice Neighborhood Demonstration research project.

The goal of this research program is to fund research related to Choice Neighborhoods that complements the work already being funded by HUD through the Choice baseline research project (C-CHI-01127/TO001). Since the Choice baseline research project will focus on implementation grants in Boston, Chicago, and New Orleans, applicants are encouraged to identify research projects in other Choice Neighborhood implementation or planning grant sites. Research projects in Boston, Chicago, and New Orleans will be eligible but the applicant must demonstrate how the proposed research would complement research already planned through the Choice baseline research project.

TYPES OF ASSISTANCE:

Cooperative Agreements

USES AND USE RESTRICTIONS:

Eligible costs include, but are not limited to, the researchers salary; assistants to work on the project; protected release time for researchers who demonstrate the need for a period of intensive research; computer software; purchase of data; transcription services, and compensation for interviews.

Applicant Eligibility:

State (includes District of Columbia, public institutions of higher education and hospitals); Local (includes State-designated Indian Tribes, excludes institutions of higher education and hospitals); Sponsored organization; Public nonprofit institution/organization (includes institutions of higher education and hospitals); Other public institution/organization; Specialized group (e.g. health professionals, students, veterans); Small business (less than 500 employees); Profit organization; Private nonprofit institution/organization (includes institutions of higher education and hospitals); Quasi-public nonprofit institution/organization; Other private institutions/organizations; Since one purpose of this NOFA is to broaden the community of researchers working on Choice Neighborhoods, HUD will not directly fund entities or individuals already involved in HUD-funded Choice Neighborhoods research under Task Order C-CHI-01127/TO001.

Beneficiary Eligibility:

Federal; Profit organization; Private nonprofit institution/organization; Other private institution/organization; Interstate; Education Professional; Scientist/Researchers; State; Local; Sponsored organization; Public nonprofit institution/organization; Other public institution/organization; The goal of this research program is to fund research related to Choice Neighborhoods that complements the work already being funded by HUD through the Choice baseline research project (C-CHI-01127/TO001). Since the Choice baseline research project will focus on implementation grants in Boston, Chicago, and New Orleans, applicants are encouraged to identify research projects in other Choice Neighborhood implementation or planning grant sites. Research projects in Boston, Chicago, and New Orleans will be eligible but the applicant must demonstrate how the proposed research would complement research already planned through the Choice baseline research project. 4 There are some substantial challenges in evaluating a program like Choice Neighborhoods. First, it is difficult to establish a convincing counterfactual of what would have happened to the neighborhood and its residents in the absence of the Choice Neighborhoods intervention. Second, because Choice Neighborhoods combines a variety of services and investments related to housing, education, public safety, job training, etc. it is difficult to explain why a particular approach does or doesn't work. Third, neighborhoods are dynamic the people and businesses that participate in, or rely upon, a neighborhood are constantly changing. The Choice Neighborhoods investment may have benefits that accrue to individuals, businesses, or other entities not captured in the Choice baseline research project, which focuses on the neighborhood and the individuals living there at baseline. Applicants are encouraged to identify research that will overcome these challenges and provide clear evidence of the impact of Choice Neighborhoods. HUD is using this NOFA rather than a contract (or task order under the existing BPA) for two reasons: 1. To solicit research ideas that are related to Choice Neighborhoods, but that are not already apparent to HUD, and 2. To broaden the community of researchers working on Choice Neighborhoods. Proposals should identify research questions that will help to demonstrate the impacts of Choice Neighborhoods or to help improve the program.

Purchasers must provide financing for the purchases by their own means and are responsible for their portion of closing costs and broker fees. Eligible purchasers must live and work in the community. Mortgagee Letter 2013-20, dated June 12, 2013, clarified the relevant regulations, policies, and procedures for implementation of the Good Neighbor Next Door Program. OBJECTIVES:

To develop viable urban communities by providing decent housing, a suitable living environment, and expanding economic opportunities, principally for persons of low and moderate income.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Recipient communities may undertake a wide range of community-based activities directed toward neighborhood revitalization, economic development, and community services, facilities, and improvements. Entitlement communities develop their programs and set their funding priorities in conformance with the statutory standards, program regulations, and other federal requirements. Specific activities that can be carried out with Community Development Block Grant (CDBG) funds include acquisition of real property; relocation; clearance and demolition; rehabilitation of residential and nonresidential structures; provision of public facilities and improvements, such as water and sewer facilities (which require reviews by the State single point of contact or a Regional Planning Agency in accordance with Executive Order 12372), streets, and neighborhood centers. Within program limitations, CDBG funds can also pay for public services. Recipients may provide assistance to microenterprises or other for-profit entities when the recipient determines that such assistance is appropriate to carry out an economic development project. Community-based development organizations may carry out neighborhood revitalization, community economic development, or energy conservation activities. Each CDBG eligible activity must meet one of three national objectives: benefit low- and moderate-income persons, aid in the prevention or elimination of slums or blight, or meet other community development needs having a particular urgency that the grantee is unable to finance on its own.

Applicant Eligibility:

Executive Order 12372 is applicable only where a recipient proposes to use funds for the planning or construction (reconstruction or installation) of water or sewer facilities.

Application Procedures:

14.228 Community Development Block Grants/State's program and Non-Entitlement Grants in Hawaii

ASSISTANCE LISTINGS DESCRIPTIONS

State CDBG,

FEDERAL AGENCY:

ASSISTANT SECRETARY FOR COMMUNITY PLANNING AND DEVELOPMENT, HOUSING AND URBAN DEVELOPMENT, DEPARTMENT OF

AUTHORIZATION:

Housing and Community Development Act of 1974, Title I, Section 101-122, Statute 88-633, Public Law 93-383, 42 USC Code 5301-5322.

OBJECTIVES:

The primary objective of this program is the development of viable urban communities by providing decent housing, a suitable living environment, and expanding economic opportunities, principally for persons of low- and moderate-income. Each activity funded must meet one of the program's National Objectives by: Benefiting low- and moderate-income families; aiding in the prevention or elimination of slums or blight; or meeting other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community where other financial resources are not available.

TYPES OF ASSISTANCE:

Formula Grants

USES AND USE RESTRICTIONS:

Thirty percent of funds available for distribution under each annual appropriation for the Community Development Block Grant (CDBG) program is allocated among the States and Puerto Rico (which is considered to be a state for the State CDBG program) for use in areas which are not a metropolitan city or part of an urban county (nonentitlement areas). All States except Hawaii have elected to administer these CDBG funds for areas that do not receive CDBG entitlement grants (14.218). HUD awards the formula grants to these States under the CDBG/State Program. In Hawaii, HUD awards the state's share of these funds to the three non-entitlement counties by formula. States must distribute CDBG funds to units of general local government (counties, towns, etc.) in nonentitlement areas. States develop their own programs and funding priorities. Units of general local government then carry out community development activities funded by the State. Eligible activities are directed toward neighborhood revitalization, economic development, or provision of improved community facilities and services. Specific activities that can be carried out with block grant funds include: Acquisition, rehabilitation or construction of certain public works facilities and improvements, such as streets, water and sewer facilities, neighborhood centers, recreation facilities, and other public works; demolition and clearance; rehabilitation of public and private buildings including housing; code enforcement; relocation payments and assistance; economic development; planning activities; certain public services with some restrictions; and administrative expenses. The projected use of funds must be developed to ensure that all activities will meet one of the three national objectives described under "OBJECTIVES". Communities receiving CDBG funds from a state may select subgrantees to carry out approved projects. Such subgrantees may include: Neighborhood-based nonprofit organizations; local development corporations; Small Business Investment Companies; or other nonprofit organizations serving the development needs of nonentitlement areas. Grant recipients may provide assistance to for-profit entities when the recipient determines that the provision of such assistance is appropriate to carry out an economic development project. Communities are restricted from constructing or rehabilitating public facilities for the general conduct of government and from making housing allowances or other income maintenance-type payments. Each State may use a limited portion of its grant, subject to a matching requirement, to administer the program. Each State may also use a limited portion of its grant, with no matching requirement, to provide technical assistance to local governments and nonprofit program recipients. At least seventy percent of the funds received must benefit low and moderate income persons.

Applicant Eligibility:

State (includes District of Columbia, public institutions of higher education and hospitals); Forty-nine State governments and the Commonwealth of Puerto Rico receive funds from HUD under this program. The state of Hawaii does not participate and HUD allocates the state's share of funds to the three Hawaii non-entitled counties. Funds are allocated to each state based on a statutory formula. States must distribute the funds to units of general local government in nonentitlement areas.

Beneficiary Eligibility:

Local; Moderate Income; Low Income; The principal beneficiaries of CDBG funds are low- and moderate- income persons. For non-metropolitan areas, low- and moderate- income is generally defined as 80 percent of the median income for non-metropolitan areas of the State or of the county, whichever is higher, adjusted for family size. For eligible localities in metropolitan areas, low- and moderate-income is generally defined as 80 percent of the median income for the metropolitan area, adjusted for family size.

Each state and non-entitled Hawaii county must submit a Consolidated Plan, an annual action plan and certifications to HUD. The Consolidated Plan and annual action plan cover four major formula-distribution HUD community development programs, including CDBG. The annual action plan must contain the method by which the State will distribute its CDBG funds.

OBJECTIVES:

Community Compass is HUDs integrated technical assistance and capacity building initiative. Community Compass is designed to help HUDs customers navigate complex housing and community development challenges by equipping them with the knowledge, skills, tools, capacity, and systems to implement HUD programs and policies successfully and be more effective stewards of HUD funding. The goal of Community Compass is to empower communities by providing effective technical assistance and capacity building so that successful program implementation is sustained over the long term. 14.272 National Disaster Resilience Competition

Community Development Block Grant P. L. 113-2,

FEDERAL AGENCY:

ASSISTANT SECRETARY FOR COMMUNITY PLANNING AND
DEVELOPMENT, HOUSING AND URBAN DEVELOPMENT, DEPARTMENT
OF

AUTHORIZATION:

Disaster Relief Appropriations Act, 2013 Public Law 113-2., Public Law 113-2

OBJECTIVES:

The overall CDBG program objective is to develop viable urban communities, by providing decent housing and a suitable living environment, and by expanding economic opportunities, principally for persons of low and moderate income. The National Resilient Disaster Competition program funds appropriated by P.L. 113-2 are available for resilient recovery projects and necessary expenses related to disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization in the most impacted and distressed areas resulting from a major disaster declared pursuant to the due to Hurricane Sandy and other eligible events in calendar years 2011, 2012, and 2013.

TYPES OF ASSISTANCE:

Project Grants (Discretionary)

USES AND USE RESTRICTIONS:

The competition supports innovative resilience projects at the local level while encouraging communities to adopt policy changes and activities that plan for the impacts of extreme weather and rebuild affected areas to be better prepared for the future. The competition underscores the ability communities have to not only recover from recent disasters but also rebuild better and stronger for the future. It will allow them to engage local stakeholders, nongovernmental organizations and the philanthropic sector to protect their own communities from the impacts of climate change by enhancing resilient infrastructure, building on sound science, and deploying innovative approaches to investments. These funds will enable eligible communities to access resources that help both recover from the previous disaster and make plans, decisions, and investments that make them more resilient to the next disaster. Recipients may undertake a wide range of activities directed toward disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization. However, Community Development Block Grant Disaster Recovery (CDBG DR) funds may not be used for activities reimbursable by or for which funds are made available by the Federal Emergency Management Agency (FEMA) or the Army Corps of Engineers. Grantees must conduct an assessment of community impacts and unmet needs to guide the development and prioritization of planned recovery activities and develop their own programs and funding priorities as long as programs/activities conform to the statutory standards and program regulations. Some of the specific activities that can be carried out with

CDBG DR funds include buying damaged properties in a flood plain and relocating residents to safer areas; relocation payments for people and businesses displaced by the disaster; debris removal not covered by FEMA; rehabilitation of homes and buildings damaged by the disaster; buying, constructing, or rehabilitating public facilities such as streets, neighborhood centers, and water, sewer and drainage systems; code enforcement; homeownership activities such as down payment assistance, interest rate subsidies and loan guarantees for disaster victims; public services (generally limited to no more than 15 percent of the grant); helping businesses retain or create jobs in disaster impacted areas; and planning and administration costs (limited to no more than 20 percent of the grant). Eligible activities must meet at least one of three program national objectives: benefit persons of low and moderate income, aid in the prevention or elimination of slums or blight, or meet other urgent community development needs because existing conditions pose a serious and immediate threat to the health and welfare of the community where other financial resources are not available. CDBG DR grants primarily benefit low-income residents in and around communities that have experienced a natural disaster. Generally, grantees must use at least half of Disaster Recovery funds for activities that principally benefit low-and moderate-income persons. These can be either activities in which all or the majority of people who benefit have low or moderate incomes or activities that benefit an area or service group in which at least 51 percent of the populous are of low- and moderate-income. HUD can only waive this requirement on a showing of compelling need." Recipients may contract with other local agencies or nonprofit organizations to carry out components of their programs.

Applicant Eligibility:

Local (includes State-designated Indian Tribes, excludes institutions of higher education and hospitals; U.S. Territories and possessions; State; CDBG DR competitive funds are made available to States and units of general local governments designated by the President of the United States as disaster areas. These communities must have significant unmet recovery needs and the capacity to carry out a disaster recovery program (usually these are governments that already receive HOME or Community Development Block Grant allocations). Grantees may use CDBG Disaster Recovery funds for recovery efforts involving housing, economic development, infrastructure and prevention of further damage to affected areas. However, CDBG DR funds may not be used for activities reimbursable by or for which funds are made available by the Federal Emergency Management Agency or the Army Corps of Engineers.

Beneficiary Eligibility:

Small business; Profit organization; Private nonprofit institution/organization; Anyone/general public; Interstate; Homeowner; State; Local; Senior Citizen (60+); Moderate Income; Low Income; Public nonprofit institution/organization; The principal beneficiaries of CDBG DR funds are low- and moderate-income persons (generally defined as a member of a family having an income equal to or less than the Section 8 low income limit established by HUD) in communities that have experienced a disaster event. Generally, grantees must use at least half of Disaster Recovery funds for activities that principally benefit low-and moderate-income persons. These can be either activities in which all or the majority of people who benefit have low or moderate incomes or activities that benefit an area or service group in which at least 51 percent of the populous are of low- and moderate-income. HUD can only waive this requirement on a showing of compelling need."

Credentials/Documentation:

Recipients must certify they will meet program requirements and applicable federal requirements. 2 CFR 200, Sub-part E - Cost Principles applies to this program.

Preapplication Coordination:

Pre-application coordination is required. An environmental impact assessment is required for this listing. This program is excluded from coverage under E.O. 12372. Quarterly reports include information on obligation, expenditures, leveraging, drawdowns, and accomplishments for all grantee activities. DEPARTMENT OF
AUTHORIZATION:

OBJECTIVES:

To preserve the current elderly housing stock by converting units with a grant into Assisted Living Facilities (ALFs) or Service-Enriched Housing (SEH) for the frail elderly aging in place, as defined in Section 232(B)(6) of the National Housing Act and 202(k). The program is expected to promote aging in place and prevent premature institutionalization of the target population.

TYPES OF ASSISTANCE:

Project Grants

USES AND USE RESTRICTIONS:

Assisted living facilities (ALFs) are designed to accommodate frail elderly persons and people with disabilities who can live independently but need assistance with activities of daily living (that is, assistance with eating, bathing, grooming, dressing and home management activities.) ALFs must provide support services such as personal care, transportation, meals, housekeeping, and laundry. Service-Enriched Housing (SEH) is housing that is designed to accommodate frail elderly persons or elderly persons with service needs who are aging in place. Residents are able to live independently but need assistance with activities of daily living comparable to services typically provided in a licensed assisted living facility, such as healthcare-related services. These supportive services must be available through a licensed or certified third party service provider. Typical funding will cover basic physical conversion of existing project units, as well as related common and services space. The ALCP provides funding for the physical costs of converting some or all of the units of an eligible development into an ALF or SEH, including unit configuration, common and services space and any necessary remodeling, consistent with HUD or the State's statute/regulations (whichever is more stringent). There must be sufficient community space to accommodate a central kitchen or dining facility, lounges, recreation and other multiple-areas available to all residents of the project, or office/staff spaces in the ALF or SEH. Funding for the supportive services must be provided by the owners, either directly or through a third party.

Applicant Eligibility:

Public nonprofit institution/organization (includes institutions of higher education and hospitals); Other public institution/organization; Private nonprofit institution/organization (includes institutions of higher education and hospitals); Other private institutions/organizations; Only private nonprofit owners of eligible multifamily assisted housing developments specified in Section 683(2)(B), (C), (D), (E), and (F) (Section 202 projects for the elderly, Rural Housing Section 515 projects receiving Section 8 rental assistance, projects receiving project-based rental assistance under Section 8, projects financed by a below-market interest rate loan or mortgage insured under Section 221(d)(3) of the Housing Act, or housing financed under Section 236 of the National Housing Act) that have been in occupancy for at least five years are eligible for funding. To be eligible, owners must meet the following criteria: (1) Must be in compliance with Loan Agreement, Capital Advance Agreement, Regulatory Agreement, Housing Assistance Payment Contract, Project Rental Assistance Contract, Rent Supplement or LMSA Contract, or any other HUD grant or contract document; (2) Must be in compliance with all fair housing and civil rights laws, statutes, regulations, and executive orders as enumerated in 24 CFR 5.105(a).

Service-Enriched Housing is designed to accommodate elderly persons and people with disabilities with a functional limitation, meaning residents who are unable to perform at least one activity of daily living.

Credentials/Documentation:

Assisted Living Facilities must be licensed and regulated by the State (or if there is no State law providing such licensing and regulation, by the municipality or other subdivision in which the facility is located). For Service-Enriched Housing, supportive services must be available through a licensed or certified third party service provider. For both ALF and SEH, the application must include a firm commitment for the supportive services to be offered at the ALF or SEH as part of the application. Additional details regarding the rating factors will be provided in the periodic NOFAs. Area ONAPs will notify applicants of the approval or disapproval of their applications. Grant amounts offered may reflect adjustments made by the Area ONAPs in accordance with 24 CFR 1003.100(b)(2). As soon as the Area ONAP determines that the applicant has complied with any pre-award requirements and absent information which would alter the threshold determinations under 24 CFR 1003.302, the grant will be awarded. The regulations become part of the grant agreement. HUD may impose grant conditions where additional actions or approvals are required before the use of funds. **Imminent threat grants:** Applications which meet the requirement of 24 CFR 1003.401 may be approved by the Area ONAP without competition in accordance with the applicable requirements of 24 CFR 1003.304. Area ONAP will review applications and then forward it to ONAP Headquarters for final approval. A request for debriefing must be made in writing or by email by the authorized official whose signature appears on the SF424 or by his or her successor in office, and be submitted to the point of contact listed in the NOFA. Information provided during a debriefing may include the final score the applicant received for each rating factor, final evaluator comments for each rating factor, and the final assessment indicating the basis upon which funding was approved or denied. **Imminent threat grants:** Contact the Area ONAP for further questions

Renewals:

From 30 to 60 days. Renewal funding under the Tribal HUD-VASH program is subject to the availability of future appropriations. If appropriated, the process by which existing Tribal HUD-VASH recipients may seek renewal funding will be published in a Public and Indian Housing (PIH) Notice. Any criteria required under the applicable appropriation will be included in the PIH Notice. Renewal funding is subject to the requirements laid out in this notice. If funding is not available, then tribes/TDHEs should use their best efforts to allocate IHBG funds to support Homeless or At Risk of Homelessness Native American veterans and their families that are currently being assisted through Tribal HUD-VASH program.

Formula and Matching Requirements:

Statutory formula is not applicable to this assistance listing. Matching requirements are not applicable to this assistance listing. MOE requirements are not applicable to this assistance listing.

Length and Time Phasing of Assistance:

Grant funding is awarded based on 12 months of funding with final project lengths negotiated with HUD's approval. Participating tribes/TDHEs draw down funds from the HUD Line of Credit Control System (LOCCS) on a monthly basis to cover rental assistance payments. Method of awarding/releasing assistance: lump sum.

Reports:

Grant funds received under this program must be reported annually in a tribe/TDHEs Indian Housing Plan and Annual Performance Report. Information on grant funds and program income received under this program must be reported quarterly on the Federal Financial Report (SF-425). As required by Congress, tribes/TDHEs must submit demographic and financial information generated by the Tribal HUD VASH program. Tribes and TDHEs must collect and retain relevant demographic and rental information in accordance with Program Guidance 2016-05 (Record Keeping at Initial Occupancy). This information is also required to be reported through an electronic reporting system as prescribed by HUD. The electronic reporting system is not functioning yet. However, tribes/TDHEs should maintain paper/file copies of the required information as veterans are referred by VA and as veterans lease up units with the Tribal HUD-VASH assistance, so that the tribe/TDHE can submit the information once the electronic reporting system is functioning. Tribes/TDHEs will be required to transmit data from this form electronically on a monthly, quarterly, or annual basis via a method provided by HUD. HUD encourages tribes to make effective use of evidence in identifying or selecting the practices and strategies for implementing HUD VASH. All tribes and TDHEs must agree to cooperate in HUD-funded research and evaluation studies. Expenditure reports are not applicable. Performance monitoring is required through the interim and annual reexaminations criteria below: HUD has found it necessary to require interim reexaminations if a Native American veterans household income decreases so that the rental assistance payment may increase to cover the cost of rent. Further, if the program is given renewal authority, it will be necessary to conduct annual reexaminations to capture annual fluctuations in income and rent as well as track demographic data necessary for the reporting requirements of the program. Tribes/TDHEs must conduct an interim reexamination if the Native American veterans income decreases between annual certifications. If there have been any changes in income, rent, or household composition they must collect and maintained in the veterans file in accordance with Program Guidance 2016-05 (Record Keeping at Initial Occupancy). A paper copy of this information must be kept in the veterans file and be transmitted to HUD upon request once the electronic reporting system is functioning. In the event of renewal funding for the program, the tribes/TDHEs must conduct an annual reexamination of the Native American veteran and the households income to determine rental assistance payments and tenant rent contribution payments. Annual reexaminations must also collect and update household demographic, personal and rental information in accordance with Program Guidance 2016-05 (Record Keeping at Initial Occupancy). A paper copy of this information must be kept in the veterans file and an electronic version of this information must be sent to HUD upon request once the electronic reporting system is functioning. Rental information reported during the annual recertification will be used to calculate renewal funding. If, upon annual reexamination, a Native American veteran or his/her household is determined to be

over-income, the tribe can continue to serve the Native American veteran/household and not have it count towards its 10 percent over-income cap under 24 CFR 1000.110(c). If the Native American veteran/households adjusted rent contribution payment, based on the income increase, is equal to the rent for the unit, then the Tribal HUD-VASH rental assistance is no longer needed and this assistance must be used on the next eligible Native American veteran. In this instance, the over-income Native American veteran can continue to receive Case Management services from the VA for as long as the VA deems the care necessary.

Audits:

In accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, nonfederal entities that expend financial assistance of \$750,000 or more in Federal awards will have a single or a program-specific audit conducted for that year. Non-Federal entities that expend less than \$750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503. The tribe/TDHE is required to meet the requirements of 2 CFR 200, Subpart F, if applicable.

Records:

In addition to maintaining records of referral and eligibility determination, a tribe/TDHE must also collect, keep on file, and report, additional household demographic, personal (including social security numbers), and rental information using in accordance with Program Guidance 2016-05 (Record Keeping at Initial Occupancy). This information also is required to be reported through an electronic reporting system as prescribed by HUD. At initial occupancy, tribes/TDHEs will need to collect Social Security numbers (SSNs) for Homeless or At Risk of Homelessness veterans and their household members. This information must be maintained in the veterans physical file. An original document issued by a federal, state, or tribal government agency, which contains the name of the individual and the SSN of the individual along with other identifying information, is acceptable in accordance with the standards in 24 CFR 5.216(g). In the case of the Homeless or At Risk of Homelessness veteran, the tribe/TDHE must accept the Certificate of Release or Discharge from Active Duty (DD-214) or the VA-verified Application for Health Benefits (10-10EZ) as verification of SSN, and cannot require the veteran to provide a SSN card. These documents must also be accepted for proof-of-age purposes in lieu of birth certificates or other tribe/TDHE-required documentation. Please note that veterans are also issued photo identification cards by the VA. If such identification is required by the tribe/TDHE, these cards must be accepted by the tribe/TDHE in lieu of another type of government-issued photo identification.

Fiscal Year 2017: 26 tribes/TDHEs have been awarded Tribal HUD-VASH grants under the demonstration program. Fiscal Year 2018: As of January 2018, 299 Native veterans are receiving case management services from the VA, and 234 of those veterans are currently housed. The remaining 61 Native veterans in case management with the VA are in the pipeline to be housed within the program. The program has produced tangible results, housing Native veterans and their families who were living in severely overcrowded and inadequate living conditions. For example, the program has housed Native veterans who were living in places without proper water, heat, and electricity. Housing Native veterans has also helped address medical or mental health needs so they can maintain employment and their homes.

CRITERIA FOR SELECTING PROPOSALS:

Funding levels for Real Estate Services and Real Estate Appraisals are determined by the individual Tribe through participation in the BIA's budget formulation process. All applicants meeting the criteria in 25 CFR Part 900 will be funded. Appraisals are conducted for all transactions involving trust property. The time required to complete an appraisal depends on the number of requests being processed by a specific office and the resources available to meet the requests. Lease Compliance funds are distributed to the Regional offices based on three factors: (1) total number of leases, (2) total number of acres, and (3) total amount of income derived from leases. Awards for lease compliance are determined by the number of qualifying leases reported to the Agency and Regional Offices. Minimum funding of \$50,000 is allocated to each Regional office. In allocating program resources, priority is given to activities involving agriculture, oil and gas, mining, industrial, business, recreational, and other income-producing leases.

For both ARRA funded and non-ARRA funded projects, the award of a self-determination contract is made in accordance with the procedures contained in 25 CFR Part 900 "Contracts under Indian Self-Determination and Education Assistance Act," and the award of a financial assistance grant amendment to the existing education grant from the Bureau of Indian Education to the Tribe or Tribal Organization is made in accordance with the Tribally Controlled Schools Act of 1988, as amended, 25 U.S.C. 2501 et seq. Range and Average of Financial Assistance:

The amount of financial assistance can range from approximately \$6 million to \$25 million depending on the size of the school, both grade level and student enrollment, the program requirements, and the location. For the higher amounts, funding may be incremental over 2, 3, or even 5 years. Because of the limited number of schools that have received funding in the last few years and the increasing costs for construction, there is no way to determine a true representative "average" of financial assistance. Facilities Improvement and Repair: The amount of financial assistance can range significantly from a few thousand dollars to approximately \$7 million. There are several categories of projects that are included under Facilities Improvement and Repair, such as, Emergency, Roofing, Replacement/Repair, and Portable Classrooms. The average amount of financial assistance can vary depending on the category. An average amount is not calculable.

ASSISTANCE LISTINGS DESCRIPTIONS

EXAMPLES OF FUNDED PROJECTS:

2017 No Information Available. 2018 No Information Available.

CRITERIA FOR SELECTING PROPOSALS:

Replacement School Construction: Funds are appropriated based on the "Education Facilities Replacement Construction Priority List" as published in the Federal Register on March 24, 2004. Criteria emphasize providing safe, functional, code-compliant, economical and energy-efficient facilities that meet applicable accreditation standards and space guidelines. Facilities Improvement and Repair: Criteria to evaluate projects emphasize eliminating critical health and safety-related deficiencies and reducing the substantial backlog of needed improvement and repairs. Projects are prioritized on a Bureau-wide basis using a computerized formula that evaluates the seriousness of the deficiencies and the relative risks of those deficiencies to facility users. To be considered it is essential that deficiencies and projects for a Bureau funded school or dormitory to be identified in the automated inventory of Bureau facilities. In addition, there are limited funds provided under this program to address safety and health deficiencies on an immediate or interim basis as well as funds for emergency repairs under certain conditions, and for other purposes. For more information on these other programs or on the priority ranking process for Replacement School Construction or Facilities Improvement and Repair projects, contact the Headquarters Office listed above.

15.063 Improvement and Repair of Indian Detention Facilities

FEDERAL AGENCY:

BUREAU OF INDIAN AFFAIRS AND BUREAU OF INDIAN EDUCATION, INTERIOR, DEPARTMENT OF THE
AUTHORIZATION:

Indian Self-Determination and Education Assistance Act, Public Law 93-638, 25 U.S.C. 450 et seq., as amended, Title IV; Tribal Self-Governance Act of 1994, Public Law 103-413; Tribally Controlled Schools Act of 1988, as amended, Public Law 100-297, 25 U.S.C. 2501 et seq. TYPES OF ASSISTANCE:

Direct Payments for Specified Use

USES AND USE RESTRICTIONS:

Beneficiary Eligibility:

Federally Recognized Indian Tribal Governments; Federally Recognized Indian Tribal Governments in Bureau owned or funded Law Enforcement/Detention Facilities.

Credentials/Documentation:

When an eligible project has been identified, the Tribe or Tribal Organization is invited to submit an initial application accompanied by a copy of the authorizing resolution from the Federal Recognized Indian Tribal Government to be served. If

For a Self-Determination Contract (or Grant), applications are filed in accordance with 25 CFR Part 900 Contracts under the Indian Self-Determination and Education Assistance Act.

Award Procedure:

Although eligible applicants do not compete for awards, an award to a particular entity is not mandatory because requirements related to the scope of the project work, project cost, and other compliance measurements must be agreed to before funding is provided to the recipient. For non-ARRA-funded projects, projects representing the greatest needs at detention and related facilities are prioritized as part of the process of obtaining Congressional appropriations to fund the projects. Funds must be appropriated before any project awards can be made, and a change in priorities may require Congressional consultation and, for some projects above a certain dollar amount, Congressional approval of the reprogramming of funding to a different project. For ARRA-funded projects, a similar prioritization of projects representing greatest needs was implemented, resulting in the identification of projects eligible to receive ARRA funds, followed by communication with prospective recipients of the availability of ARRA funds for the identified projects. For both ARRA-funded and non-ARRA funded projects, the award of a self-determination contract is made in accordance with the procedures contained in 25 CFR Part 900 Contracts under the Indian Self-Determination and Education Assistance Act. ARRA projects also are subject to additional requirements related to performance, funding, and compliance through implementation of ARRA in the areas of transparency and reporting, oversight, risk accountability, accelerated timeframes and other statutory objectives.

Restoration of wildlife habitat to restore and protect sage grouse, desert tortoise, and other upland habitats for priority species as well as instream and riparian habitat for migratory birds, endangered or special status aquatic species and other native and priority species. Increase on-the-ground project work to conserve, restore, and reduce the threats to sage-grouse and other sensitive species in high priority habitats. Continue consistent habitat monitoring across the range of the Greater Sage-Grouse and other landscape species using the Habitat Assessment Framework (HAF) and the land use plan habitat objectives for sage grouse and other priority species. Continue seed collections within priority species habitat and continue to develop genetically appropriate native and non-

EXAMPLES OF FUNDED PROJECTS:

2017 Program accomplishments provided new information and tools to improve decision-making in wildland fire management. Program accomplishments include studies that benefit fire and resource management programs both directly and through the inherently interagency nature of many of the related projects. Projects have had direct benefit to, among others, fire management, Predictive Services, meteorologists, fuels analysts, intelligence officers, fire behavior analysts, fire specialists, fire planners, resource managers and State and local government leaders. JFSP specific accomplishments include conducting an external program review to assess current operations and strategic direction of the program. The program continues to support the Fire Science Exchange Network and the Graduate Research Innovation (GRIN) Awards. 2018 No current data available. 2019 No current data available.

CRITERIA FOR SELECTING PROPOSALS:

General criteria used to select assistance proposals are based on their direct relationship to federal wildland fire management, qualifications of principal investigator and institution, and a balanced review including relevance to program objectives, merit and cost effectiveness. Joint Fire Science Program proposals will be reviewed for relevancy in relation to the posted announcement for proposals task statement, scientific methods and study design, science deliverables, collaboration/leverage, and administrative adequacy. Successful proposals will provide a strong science delivery and application plan that clearly demonstrates the use of both passive and active technology transfer methods.

2017 Stewardship projects that removed vegetation to promote healthy forest stands and reduced fire hazards. Projects that promote an integrated approach to resource management and include local community participation in developing strategies for biomass utilization, recognizing the connections between biomass utilization and forest restoration, and encourage sustainable development through a variety of enterprises at various scales. Projects that cooperatively support common goals and interests in managing, developing and protecting Federal, State, and private lands and water resources in an environmentally and economically sound manner. The BLM continues to partner with Trinity County Resource Conservation District on the Weaverville Community Forest Stewardship project, a typical example of a stewardship cooperative agreement. This project has treated over 1,000 acres of forest adjacent to the community of Weaverville, California. Project objectives have been to thin the forest in the wildland urban interface and improve forest resilience. Timber value from the thinning has been used to offset the thinning of precommercial trees as well as trail maintenance of local hiking and biking trails. One of the primary employers in Weaverville is a lumber mill which relies on timber supplied from project like this to continue operation. 2018 No Current Data Available. 2019 No Current Data Available.

OBJECTIVES:

As an integral part of the Bureau of Land Managements (BLM) mission, the BLM provides national leadership to promote conservation of aquatic habitats, healthy aquatic ecosystems, and the fish, aquatic wildlife, and invertebrate species that are dependent upon them including native, non-native, subsistence, sportfish and aquatic invasive species. BLM lands comprise some of the most diverse and unique aquatic habitats in the world, ranging from vast wetlands and riparian areas, isolated desert springs that harbor populations of rare and unique fishes, to large river systems, such as the Columbia, Colorado, Platte, Rio Grande, and Yukon that support fishing and recreation of exceptional regional and national value throughout the contiguous United States and Alaska. Aquatic resources on BLM-managed public lands support the nations aquatic biodiversity, support public recreation, and help sustain Native American cultural heritages. The BLM works to ensure the resiliency of public trust aquatic species and habitats through on the ground programs and activities including conducting instream habitat and riparian vegetation treatments; removing passage barriers to aquatic organisms; preserving water quantity and quality; taking actions that prevent the introduction, spread, and establishment of aquatic invasive species; conducting family, youth and veterans education and outreach programs; and inventorying, assessing and monitoring aquatic organisms and habitats. The BLM manages these resources in cooperation with states, tribes, other federal agencies, and non-governmental organizations.

OBJECTIVES:

The Plant Conservation & Restoration Program was created in response to large-scale wildfires in the Western U.S. Because of a lack of native seed, in 2001 Congress directed BLM to establish a native plant material program and recommended that federal and non-federal partners coordinate efforts through the Plant Conservation Alliance which was established in 1994 (House Report 106-914). As an integral part of the Bureau of Land Management's (BLM) mission, BLM Plant Conservation & Restoration Program provides national leadership to (1) Support field office habitat management efforts to restore sage grouse, mule deer, desert tortoise, and wild game species habitats; and increase on-the-ground project work to restore and reduce the threats to sage-grouse, mule deer, and other sensitive species in high priority habitats; (2) Conduct seed collection through the Seeds of Success (SOS) Program within priority species habitat (3) Continue to work with growers to develop genetically appropriate native plant material for use in habitat restoration; (4) Continue to support and increase labor and operations of the BLM National Seed Warehouse System to assist field offices with seed procurement; (5) Support studies to improve the effectiveness of seed and seeding treatments through partners, State Offices, and Eco regional Programs; (6) Continue to monitor and protect more than 1,700 rare plant species, ~400 of which are found exclusively on BLM lands; (7) Continue to work with partners to prioritize and implement priority species conservation actions; (8) Continue to assist Emergency Stabilization & Restoration in identifying imminent post-wildfire threats, managing unacceptable risks, and restoring public lands with the use of native plant materials. The National Seed Strategy for Rehabilitation and Restoration to ensure the availability of genetically appropriate seed to restore viable and productive plant communities and sustainable ecosystems throughout the US. The Strategy fosters collaboration between private, tribal, state, local, and federal partners to guide the development, availability, and use of seed needed for timely and effective rehabilitation and restoration. BLM Plant Conservation & Restoration Program works with partners to focus studies on native plant materials development to get more diversity of native plant materials to the growers in ecoregions, including the Great Basin, Colorado Plateau, Mojave, and Pacific Northwest. Working with the Sustainability in Prison Program in the Great Basin, BLM PCRCP grows locally sourced sagebrush plants for use after wildfires in sage-grouse, mule deer, and other game species habitat restoration projects. Seeds of Success has made over 23,000 collections of 5,500 unique taxa since 2000. The Plant Conservation & Restoration Program has moved more than 200 native species into commercial production by the private sector, making them available for restoration projects. BLM PCRCP increased the capacity of the BLM National Seed Warehouse System to 2,600,000 pounds, which serves 40 BLM Field Offices and streamlines seed procurement through the Working Capital Fund (inventory value ≈ \$12 M). 15.246 Threatened and Endangered Species

FEDERAL AGENCY:

BUREAU OF LAND MANAGEMENT, INTERIOR, DEPARTMENT OF THE AUTHORIZATION:

Federal Land Policy and Management Act of 1976, 43 USC 1737 (b); Sikes Act, 16 USC 670h(c); Watershed Restoration and Enhancement Agreements (aka The Wyden Amendment), 16 USC 1011, PL 104-208, Section 124, as amended by PL 105-277, Section 136, as amended by PL 108-7, Section 135; Plant Protection Act of 2000 (PL 106-224), Federal Noxious Weed Act of 1974 (Sections 1 and 15), 7 USC 2814; P.L. 93-629, as amended by PL 101-624.

OBJECTIVES:

The BLM, as a federal agency, is required under the Endangered Species Act of 1973 to carry out programs to protect and recover threatened and endangered (T&E) species and the ecosystems upon which they depend. The BLM implements tasks identified in T&E recovery plans developed by the U.S. Fish and Wildlife Service (USFWS) and National Marine Fisheries Service. The BLM also implements conservation actions for sensitive and candidate species to preclude the need for federal listing. The Threatened and Endangered Species Program works to conserve and recover federally-listed animal and plant species and their habitat on public lands and shares cooperative responsibility with other BLM programs and partners for conservation of candidate and sensitive species. The scope of the T&E Species Program spans all taxa that merit designation under the Endangered Species Act, providing a cross section of the most imperiled species of mammals, reptiles, birds, amphibians, invertebrates, fish, and plants. As of 2018, 430 federally threatened and endangered species and over 20 federal candidate species occur within BLM jurisdiction. Public lands often provide the key habitat for species recovery and conservation. Managing more land than any other federal agency, the BLM plays a pivotal and substantive role. Due to the commingling of federal and nonfederal lands, the BLMs proactive commitment to conserve threatened and endangered species is essential to federal, state, and non-governmental organizations in meeting our mutual interest of species recovery. Collaboration on conservation endeavors with the ultimate goal to increase threatened and endangered species populations and manage and restore habitat of these federal trust wildlife, fish and plants within the public domain, serves a public purpose as required in cooperative agreements.

PROGRAM ACCOMPLISHMENTS:

Fiscal Year 2017: Made over 95 awards - The highest priority areas of focus for the Threatened and Endangered Species program are to implement recovery tasks for those species that have the highest potential to be recovered; address the needs of those species with the highest risk of extinction; and conserve those species experiencing the greatest conflict in BLM multiple use operations. There are times when, instead of approaching recovery of a specific focal species, conservation actions must be on the broader ecosystem itself, with restoration centered on its primary function or driver. Such is the case of the coastal dunes in northern California, home to seven listed plants and the western snowy plover. Fiscal Year 2018: Data are unknown at this time. Fiscal Year 2019: Data are unknown at this time.

15.247 Wildlife Resource Management

ASSISTANCE LISTINGS DESCRIPTIONS

FEDERAL AGENCY:

BUREAU OF LAND MANAGEMENT, INTERIOR, DEPARTMENT OF THE AUTHORIZATION:

Federal Land Policy and Management Act of 1976, 43 USC 1737 (b); Sikes Act, 16 USC 670h(c); Watershed Restoration and Enhancement Agreements (aka The Wyden Amendment), 16 USC 1011, PL 104-208, Section 124, as amended by PL 105-277, Section 136, as amended by PL 108-7, Section 135.

OBJECTIVES:

The BLMs Wildlife Program manages wildlife habitat to help ensure self-sustaining, abundant and diverse populations of wildlife on public lands. In order to provide for the long-term conservation of wildlife resources, the BLM supports numerous habitat maintenance and restoration activities. BLM-managed lands are vital to thousands of mammal, reptile, avian, and amphibian species. Managing more wildlife habitat than any other federal agency, the BLMs wildlife program helps ensure self-sustaining populations and a natural abundance and diversity of wildlife (a publically owned resource) on public lands. Overall, we manage habitat for more than 3,000 species of wildlife dispersed over some of the nations most ecologically diverse and unique habitats. In order to provide for the long-term protection of wildlife resources, the BLM supports numerous habitat conservation activities, many funded through partnerships with state, and nongovernmental organizations. Those funded in partnership with state agencies in particular, are generally accepted as projects with deliverables of mutual interest but primarily benefitting wildlife, which is a public resource. In that wildlife is not a BLM owned resource, this benefit is assumed to be primarily for a public purpose. As a cooperative agreement with only an estimated outcome to maintain flexibility to address a mutual conservation need, agreements of this kind best serves the public as cooperative or assistance agreements rather than a contract. Agreements with non-governmental organizations that do not have set deliverables and benefit the public resources, wildlife, also have objectives that fit this criteria.

TYPES OF ASSISTANCE:

Cooperative Agreements (Discretionary Grants)

USES AND USE RESTRICTIONS:

Projects are primarily conducted on lands administered by the BLM but may also be conducted on other public or private lands. Projects not on public lands should demonstrate effects on wildlife resources that share use of public and non-public lands. Projects may also include development of decision support tools and information to enhance wildlife conservation. Most of these lands are located in the Western United States and Alaska. Assistance can be used to help protect, restore, and assess wildlife resources and to provide related public contact/education opportunities. Funding is highly variable each fiscal year.

Applicant Eligibility:

Anyone/general public; Anyone/general public with the exception of other federal agencies. Applicants must competitively apply to postings on Grants.gov to opportunities posted by the office that has funding and the desire to accomplish conservation cooperatively with an applicant that can deliver to a level of public purpose that addresses the wildlife conservation need outlined in the opportunity listing.

All western States Fish and Game agencies were awarded at least two to three awards to assist in achieving mutual objectives for wildlife conservation. Invasive species projects were awarded to at least 25 western counties to advance the control of invasive species that impact wildlife habitat. All wester bird observatories were awarded projects to help planning and NEPA decision support tool development. The highest priority areas for sage-grouse conservation within the BLM wildlife program are the Sagebrush Focal Areas identified by the FWS in October 2014 and subsequently identified by the BLM as Sagebrush Focal Areas in the proposed land use plans. Some of these Sagebrush Focal Areas cross state boundaries so those BLM State Offices will continue to demonstrate landscape scale management of sage-grouse habitats utilizing partners. BLM programs will work with partners to focus research on assessment of other sage obligate species as BLM implements sagebrush conservation. BLM will support enhancement of knowledge of migratory pathways of migratory wildlife, in particular that of big game. In addition, will be partnering with states to assess conservation needs of species of economic value and species in decline. Fiscal Year 2018: Data is unknown at this time.
